1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 28, 46, 65 are rejected under 35 U.S.C. 102(b) as being anticipated by Willard (5,851,176).

Willard teaches a pressure lockout arrangement (10) for an implantable prosthesis having a housing with an inlet and outlet, a valve (38) disposed between the inlet and outlet, the valve is biased towards substantially seating the outlet. Willard further shows a supplemental biasing mechanism (column 7, lines 20-40) that is responsive to pressure increases from the inlet to increase the biasing of the valve toward sealing the outlet.

3. Claims 1, 28, 46, 65 are rejected under 35 U.S.C. 102(b) as being anticipated by Burton et al (5,141,509).

Burton et al teaches a pump assembly for an implantable prosthesis having a housing with a fluid passageway through the chamber and having an inlet and outlet (64, 62); and a first valve (58). Burton et al has an outlet sealing mechanism (56) that is responsive to inadvertent pressure increases from the inlet (Figure 8, column 6, lines 3-20).

4. Claims 2-18, 29-36, 47-59, 66-72 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
